

MOHAMED SALAH

FLUTTER DEVELOPER

mohamed_salah_414@yahoo.com

PERSONAL PROFILE

Always up for a challenge, I have worked for freelancers' sites and gotten more experience from companies and start-ups where I worked with. I have a **Bs.** in **Computer Science** and many years of experience in designing and marketing before going into **flutter** development. that helped me to improve in **UI/UX** design at the same time developing **flutter** apps.

Jan 2021 - Present

FLUTTER PROJECTS

Entertainment App

Delivery and Shipping

Portfolio

Sample Portfolio for my work and contacts

Casting (Actor side)

Each actor can browse and apply for each director's projects from films, advertisements, or filming sessions, and can view his own photos and videos, and create his own photo gallery, explaining his technical and personal specifications.

Hera (Customer side)

Ladies can book appointments to go to the beauty center and browse the services and products and chat with the beauty center.

Gym System (User & Trainer sides)

The user can book a training session in the gym with or without his personal trainer using the application's coins and can search across the map for the nearest branches, specify directions to them, browse the trainers' photos and videos, and message them and the gym as well.

Clinic System (Patient side)

The patient can browse the clinics and doctors and book the appropriate appointment for him, and he can chat with the clinic.

Hiring System (Company side)

Each company can create its own account that contains all its information and can search for employees to hire them based on some of the requirements specified by the company.

Reminder Religious App

The application contains the Holy Qur'an without the Internet or ads and contains translation, interpretation, and reading in the voice of the sheikhs, and the user can activate the notifications for the call to prayer and remind him of some religious supplications.
