MOHAMED SALAH

Senior Software Engineer

+20 101 758 4607 · mohamed_salah_414@yahoo.com · LinkedIn · GitHub · Website · Open to Relocation · Remote-Ready

PROFESSIONAL SUMMARY

Senior Software Engineer with 5 years delivering production-grade mobile applications across health, fintech, e-commerce, education, and ERP domains. Shipped apps achieving #4 in App Store Health & Fitness with 50K+ downloads and 4.6★ ratings. Expert in Clean Architecture, BLoC/Riverpod, Firebase, and full-cycle delivery, from system design through CI/CD and store deployment. Leverages AI-assisted development (Claude, Gemini, GitHub Copilot) to accelerate delivery, reduce error rates, and improve code quality. Proven track record of optimizing performance (30–50% startup time reduction), establishing quality pipelines, and mentoring engineers. Targeting senior remote and on-site roles across Gulf, European, and international markets.

WORK EXPERIENCE

Senior Flutter Developer | Flojics Technology | Alexandria, Egypt · Hybrid *June 2023 – Present*

- **Led end-to-end development** of 5+ production apps (health, fintech, e-commerce, education, ERP) serving 50K+ users on Android and iOS within a cross-functional team of 3–5 engineers.
- **Reduced cold start time by 30–50%** through Flutter DevTools profiling, lazy loading, and widget tree optimization.
- Established a **GitHub Actions CI/CD pipeline**, automating build, test, and deployment workflows and cutting manual release overhead.
- Integrated **Firebase Analytics, AppsFlyer, and Branch.io** to build a full attribution pipeline, enabling data-driven product decisions.
- Implemented **Stripe and Tpay** payment flows with secure storage; zero reported payment incidents in production.
- Leveraged **Claude, Gemini, and GitHub Copilot** throughout the development workflow to accelerate feature delivery and reduce bug rates.
- Enforced quality through unit, widget, and integration testing (flutter_test, mockito); led weekly **code reviews** and mentored 1–2 junior developers.

Flutter Developer | Rare Crew | Bratislava, Slovakia · Remote *Nov 2022 – Mar 2023*

- **Refactored a legacy Flutter codebase** to Clean Architecture with GetIt dependency injection, improving testability and reducing module coupling.
- Decomposed a monolithic UI into a **reusable component library**, improving consistency and reducing duplication across screens.
- Delivered sprint commitments within a **remote European Agile team**; resolved critical production bugs through structured QA collaboration.

Flutter Developer | Coappso | Alexandria, Egypt · On-Site *Mar 2022 – Nov 2022*

- **Independently designed and shipped 7+ production apps** (e-commerce, booking, ERP) from zero to store as the sole engineer, without senior oversight.
- Owned the full product lifecycle per app: architecture, UI/UX, backend integration, testing, and **App Store / Play Store deployment**.
- Integrated secure payment gateways, push notifications, and real-time features across all client projects using **Clean Architecture and modular patterns**.

SKILLS

Languages	Dart, JavaScript, basic Kotlin, basic Swift
Frameworks	Flutter 3.x, Riverpod, BLoC, Provider, React.js (learning)
Architecture	Clean Architecture, MVVM, Repository Pattern, Dependency Injection (GetIt / Injectable)
Mobile	Android (Play Store), iOS (App Store Connect, TestFlight), Deep Linking, In-App Purchases, AR
Backend/APIs	Firebase (Auth, Firestore, FCM, Analytics, Crashlytics), REST APIs, Pusher, WebSockets, SQLite, Hive
Payments	Stripe, Tpay, Google Pay, Apple Pay, In-App Purchases
Analytics	Firebase Analytics, AppsFlyer, Branch.io, Mixpanel
AI Tools	Claude, Gemini, GitHub Copilot, used for code acceleration, debugging, and error reduction
CI/CD & Tools	GitHub Actions, Fastlane, Git, JIRA, Agile / Scrum
Testing	Unit, Widget & Integration Testing (flutter_test, mockito)
Design	Figma, Responsive UI, Accessibility (a11y), RTL / Localization (l10n, i18n)

KEY PROJECTS

Toheal Health & Fitness *#4 in Category · 50K+ Downloads · 4.6★ | Google Play · App Store*

Mental health and community support platform with anonymous sharing, real-time chat, and emotional guidance.

- **Designed and built the full architecture** using Clean Architecture and the BLoC pattern.
- Built **real-time chat, reactions, and anonymous posting** using Firestore streams and Firebase Cloud Messaging.
- Implemented offline read support with sync on reconnection; delivered an accessible, localized UI on Android and iOS.

Zidly FinTech *Google Play · App Store*

QR-code tipping platform that lets customers tip waiters, baristas, drivers, and other service workers instantly and anonymously.

- **Built the entire app end to end**, including the scan-to-tip flow: instant QR scanning, recipient preview, suggested or custom amounts, and a clear tip, fee, and total breakdown before payment.
- Integrated **Google Pay, Apple Pay, and card payments** through the payment provider, with card data never stored in the app and bank details masked to the last four digits.
- Implemented **identity verification** for tip recipients, biometric sign-in, anonymous tipping by design, workplace onboarding via Business ID, and full Arabic/English RTL support.

FLOSales Sales & Ops *Google Play · App Store*

Sales and operations management platform for order, inventory, warehouse, and delivery tracking.

- **Developed** with Clean Architecture and reusable component-based design; implemented order management, inventory tracking, and warehouse transfers.
- Integrated **real-time data sync, offline-first capabilities**, and push notifications for sales and operations teams.
- Delivered a responsive, scalable UX handling complex logistics workflows across Android and iOS.

INCK EdTech *Google Play · App Store*

Platform connecting students and teachers for online or in-person tutoring sessions.

- Built a scheduling and booking system with **role-based dashboards**; integrated maps for in-person sessions and video for online ones.
- Implemented real-time FCM notifications; shipped with dark mode, accessibility features, and full localization.

Butler FM Workforce *Google Play · App Store*

Shift tracking and daily task management app for field teams.

- **Built** secure shift check-in/out with offline fallback, background location tracking, and automated task reminders.
- Delivered an analytics-ready architecture for user behavior monitoring and management reporting.

Other Projects: Mowein · iRove · Pets · E_Approvals · Casting App · Hera App · Gym System · Clinic System · Hiring System · Religious App · Medicals Time · Estimate · Slither X

EDUCATION

Bachelor of Science, Computer Science *July 2021*

Alexandria University · Alexandria, Egypt
